Subject: Agenda for May 24th Meeting of Yale Carbon Containment, Dept of Ecology and EPA
Date: Monday, May 23, 2022 6:43:30 AM
Attachments: [TrapRock Justification For Class V Exemption 5.20.22 vf.pdf](#)
[Yale Project 2022 04 06 Memo to EPA.pdf](#)

Good morning. We are looking forward to our meeting with you tomorrow at 10:30. We appreciate the two agencies attending this meeting together. Evan, I'm sorry but I don't have Ryan's email address. If you could forward this email to him I would appreciate it.

I include here a proposed agenda and a short memo explaining why YCCL believes if it necessary to exceed 1000 metric tons of CO2 for the proposed pilot wells. For ease of reference, I am also including a copy of the memo we previously provided to EPA that addresses the "experimental" nature of the pilot wells.

I. Introductions

II. Project and Regional Visit Update — Anastasia/YCCL

III. Need to Exceed 1000 metric tons of CO2 at Pilot Wells — Charlie/YCCL

IV. Why EPA Should Classify the Pilot Wells as Experimental — YCCL

V. Discussion — all

VI. Next Steps — all
